16 – 20 March 2020, Kuala Lumpur / Malaysia

Introduction

The purpose of this program is to provide the participants with skills and competencies to enable them to solve problems and take decisions, for working towards continuous improvements within their work context. In five days, we will provide the participants with a framework of tools and techniques to develop new ways of thinking, solving problems and reaching to rational decisions.

The program will provide the participants the theory and then the opportunity to apply the theory in a practical way to improve the quality their work. Influencing management decision-making styles in a way that encourages participants and transferring styles of management.

Objectives

By the end of this course practitioners shall learn to:

- Make better decisions through critical thinking and creative problem solving
- Adapt to different thinking styles in group and team environments
- Key steps in problem solving and decision making
- Developing the creative side of your brain.
- Recognize and remove barriers to individual and group creativity
- Systematically analyze a target problem
- Choose the decision-making strategy that best fits the situation
- Transform your creativity into practical business solutions

Who Should Attend?

These programs are designed for individuals who have or expect to have responsibility for leading or managing a project, subproject, or project phase. Newcomers will learn new skills. More experienced managers will enhance their ability to apply what they already know.
