Introduction

Business Intelligence, BI is a concept that usually involves the delivery and integration of relevant and useful business information in an organization. Companies use BI to detect significant events and identify/monitor business trends to adapt quickly to their changing environment and a scenario. If you use effective business intelligence training in your organization, you can improve the decision making processes at all levels of management and improve your tactical strategic management processes.

In this course, you will gain the knowledge and skills for using business intelligence purposes and for working as a business intelligence developer. You'll have the opportunity to learn how MicroStrategy's Online Analytical Processing (OLAP) and Visualization capabilities capable to create visualizations and dashboards.

The course gives an overview of how business intelligence technologies can support decision making across any number of business sectors. These technologies have had a profound impact on corporate strategy, performance, and competitiveness and broadly encompass decision support systems, business intelligence systems, and visual analytics. The sessions are organized around the business intelligence concepts, tools, and applications, and the use of data warehouse for business reporting and online analytical processing, for creating visualizations and dashboards, and for business performance management and descriptive analytics.

Objectives

- The precipitants will learn how to accelerate the work towards achieving the Vision goals and objectives of the Vision 2030.
- To be proactive and face the implementation challenges of Vision initiatives and providing solutions.
- Analyzing the gaps and evaluating the pain points that come along with the Vision's programs.
- Creating a motivating and productive work environment that attracts competent and national talents.
- Supporting the "Vision 2030" governance framework to ensure disciplined internal operation and alignment with government agencies.
- Following up on - and improving – the processes of the organizations relating to the Vision.
- Raising awareness in the organizations towards the latest developments in achieving the Vision.
