Introduction

This five-day program will help you develop the personal and professional “soft” skills needed to lead your project team. The first part of the program covers vital general management skills such as motivation, feedback, and delegation. Other topics include how to develop agreement on roles and responsibilities, when to emphasize task behaviors over relationship behaviors, and how to build a team that sees itself as a team.

The second part of the program is devoted to building the skills you will need to craft constructive, win-win agreements within the project team as well as between the project team and the other stakeholders. Exercises will help you master basic concepts such as positions vs. interests, how to prepare for a negotiation, and how to behave during the negotiation. The material is equally applicable to internal negotiations and contract negotiations.

Approximately 50% of class time is devoted to casework and experiential learning. During hands-on exercises, you will work as part of a team to develop a business case, a work breakdown structure, range estimates, a network logic diagram, and a risk response plan.
