Introduction

Week One:

Since 1956, AACE International (the Association for the Advancement of Cost Engineering) has provided its members with the resources they need to enhance their performance and ensure continued growth and success.

The AACE International program's intent is to recognize specialists who meet a demanding set of planning and scheduling criteria. The PSP certification will distinguish you as a Planning and Scheduling Professional who has the knowledge and skills that impact the bottom line.

AACE's PSP certification provides an exam and experience validation that lets employers identify those who meet the program's competency standards.

In recent years, the Project Management Professional Certification (PMP)® from the Project Management Institute "PMI" has become the most sought after certification in the world of project management professionals.
