Introduction

We believe that leaders are more “made” than “born.” Current leadership research indicates that there are few genetic characteristics that influence one's ability to become a leader. Our role in the program is not to teach one how to become a leader, but to help one learn how to become a more effective leader. From our perspective, leadership is a life-long journey. This course can help you acquire the knowledge, skills, feedback, and opportunities necessary for personal growth.

The program focuses on individual development and is based on the belief that individuals can expand their leadership capacities; they can learn, grow, and change. Imagine increasing productivity, reducing waste and improving customer satisfaction by developing a process for effectively solving problems and decision making.

These benefits and many others are the excellent reasons to learn the creative problem solving techniques outlined and build a toolkit for solving problems and decision making that form part of everyday life in today's organization.

The format for the program includes discussion, readings, group activities, and pairing with a mentor.
