Introduction

The built environment has a profound impact on our natural environment, economy, health, and productivity. Breakthroughs in building science, technology, and operations are now available to designers, builders, operators, and owners who want to build green and maximize both economic and environmental performance.

Through the LEED® green building certification program, the U.S. Green Building Council (USGBC) is transforming the built environment. The green building movement offers an unprecedented opportunity to respond to the most important challenges of our time, including global climate change, dependence on non-sustainable and expensive sources of energy, and threats to human health. The work of innovative building professionals is a fundamental driving force in the green building moment. Such leadership is a critical component to achieving USGBC's mission of a sustainable built environment for all within a generation.

Objectives

This course aims to meet the continuing education needs of professionals who are involved in the process of sitting in for the exam to become LEED Green Associates (LEED GA) in advance of becoming LEED Accredited professionals with specialty or for those who need further learning on the principals of LEED design. This program will also benefit government officials, architects, engineers and general public sectors who are interested in managing a LEED Certified Project on behalf of their organizations and who primarily act as owner representatives. On completion of the course, the learners will be able to:

1. Present a working definition of the LEED Green Associate body of knowledge
2. Understand the LEED GA requirements and LEED AP certification process
3. Understand the different categories of the LEED system
4. Acquire the necessary knowledge, tips and study hints to pass the exam.

مقدمة

البيئة المبنية لها تأثير عميق على بيئتنا الطبيعية، والاقتصاد، والصحة، والإنتاجية. فهناك تطور في علوم البناء، والتكنولوجيا، والعمليات المتاحة للمصممين والبنائين والمالكين الذين يريدون ابناءه خضراء و يرغبون في تطوير كل من الأداء الاقتصادي والبيئي. من خلال البرنامج الخضراء LEED® شهادة بناء، يقوم المجلس الأمريكي للمباني الخضراء (USGBC) بتحويل البيئة المبنية. ان عليه التحول الى المباني الخضراء يوفر فرصة غير مسبوقة للرد على أهم التحديات في عصرنا، بما في ذلك تغير المناخ العالمي، والاعتماد على مصادر غير مستدامة ومكلفة من الطاقة، والأخطار التي تهدد صحة الإنسان.

أهداف البرنامج

وتهدف هذه الدورة إلى تلبية احتياجات التعليم المستمر للمهنيين الذين يرغبون في اجتياز الامتحان لكي يحصلوا على شهادة LEED المعتمدة للمهنيين مع التخصص أو لأولئك الذين يحتاجون إلى مزيد من التعلم على مبادئ تصميم LEED. هذا البرنامج سوف يتفقد أيضا المسؤولين الحكوميين والمهندسين المعماريين والمهندسين القطاعات العامة الذين يرغبون في إدارة المشروع معتمد من LEED نيابة عن منظماتهم والذين يعملون في المقام الأول إلى ممثلي المالك.

بعد الانتهاء من الدورة، سوف تكون قادرة على المتعلمين :

- تقديم تعريف عملي ل LEED
- فهم متطلبات LEED GA وعملية التصديق LEED AP
- فهم فئات مختلفة من نظام LEED
- اكتساب المعرفة اللازمة، نصائح وتلميحات الدراسة لاجتياز الامتحان.
