

# HR Metrics and Analytics

03 – 07 November 2019, Oman

## Introduction:

The HR function can become a high-value-added part of the organisation and play a key role in developing and implementing corporate strategy. This is because of the growing importance of human capital in organisational success.

The HR function will be more effective as a strategic partner in the organisation rather than a purely administrative function. Such an HR function will drive change rather than react to it.

In order to achieve this highly desired prize, the HR function must develop its ability to measure how HR decisions affect the organisation and how the decisions taken by the organisation affect human capital. In short, the HR function needs to develop better metrics and analytics if it is to become a true strategic partner.

Once the metrics are established, the organisation will need to develop HR policies that react to the messages. The course will also consider the type of HR policies that are being developed in response to the usual range of messages from the metrics and analytics.

## Objectives:

- To examine the use of internal and external measurement frameworks which establish the contribution of the HR function
- To examine the use of internal and external measurement frameworks which establish the contribution of the organisation's Human Capital
- To consider the messages that are revealed by such frameworks for the organisation as a whole
- To make decisions based on evidence rather than opinion
- To understand what is going on that affects the Human Capital of an organisation
- To drive strategic change rather than react to it
