والتفاوض والتعاقد وبناء فرق العمل الفعالة – معتمد عالمياً**

22 May – 02 June 2023

Dubai / UAE

Introduction

This program is devoted to building the skills you will need to craft constructive, win-win agreements within the project team as well as between the project team and the other stakeholders. Exercises will help you master basic concepts such as positions vs. interests, how to prepare for a negotiation, and how to behave during the negotiation. The material is equally applicable to internal negotiations and contract negotiations.

It covers a variety of advanced topics that will help you improve your ability to satisfy your stakeholders' success criteria. You will learn how to evaluate your own performance as a project manager, how to identify organizational weaknesses that interfere with benefits realization, and how to recognize and compensate for weaknesses in Critical Path analysis. In addition, you will learn a structured approach to identifying, selecting, and managing contracts; how to use project dynamics to address intractable problems; and how to analyze and understand cultural differences that so often cause problems in multinational projects.

Approximately 50% of class time is devoted to casework and experiential learning. During hands-on exercises, you will work as part of a team to develop a business case, a work breakdown structure, range estimates, a network logic diagram, and a risk response plan.

Objectives

Upon completion, you will be able to:

- Define the characteristics of an effective leader
- Create a motivating work environment
- Provide useful feedback to team members
